## 4PAHPADD – MODULE LEARNING OUTCOMES

---

Many of the learning outcomes from other modules are relevant to this module insofar as the learning outcomes G1 – G3 refer to the content of the other modules within the first year of the BSc Programme.

### Module learning outcomes

At the end of this module, you should be able to:

- G1. Appreciate the complexity of real world scenarios and see the potential role of Psychology (interacting with other disciplines) in addressing these issues.
- G2. Apply psychological and other theory and research, and be aware of its limitations
- G3. Discuss and apply ethical considerations impacting on applied psychological and other research
- G4. Develop and demonstrate presentation skills in a variety of formats to explain your work.

### Semester 1

After completing the activities this semester, you should be able to:

- 1.1 Work successfully as part of a team, integrating the skills, ideas and knowledge of all members
- 1.2 Identify specific features of a problem to which psychological knowledge and skills can be applied, including the specific population affected.
- 1.3 Contribute to developing a practical proposal to address a well-specified problem, using psychological knowledge from other Semester 1 modules.
- 1.4 Contribute to designing (using suitable software) and presenting an academic poster to communicate your proposal in a concise and clear manner.
- 1.5 Evaluate and describe the successes and limitations of the problem, and of the poster communication, including your own contribution to these.

### Semester 2

After completing the activities this semester, you should be able to:

- 2.1 Work successfully as part of a team, integrating the skills, ideas and knowledge of all members
- 2.2 Identify specific features of a problem to which psychological knowledge and skills can be applied, including the specific population affected.
- 2.3 Contribute to developing a practical proposal to address a well-specified problem, using psychological knowledge from first year modules, including Semester 2 modules.
- 2.4 Contribute to designing (using suitable software) and presenting an audio-visual presentation to communicate your proposal in a concise and clear manner.
- 2.5 Evaluate and describe the successes and limitations of the problem, and of the AV presentation, including your individual contribution to these.
